

iZap

Automated Replenishment System

iPower
Distribution Group

iZap Benefits

- ⚡ Reduce Inventory Costs
- ⚡ Reduce Order Processing Costs
- ⚡ Save Time and Paperwork
- ⚡ Eliminate Ordering Errors
- ⚡ Implement Lean Manufacturing
- ⚡ Reduce On-hand Inventory
- ⚡ Increase Turns
- ⚡ Increase Cash Flow

What's iZap?

iZap Supplier is a bar code scanner-based system that automates and consolidates the reordering and replenishment of frequently used direct and indirect materials.

iZap enables users to lower overall supply chain costs by reducing the total cost of inventory ownership through better management.

iZap allows suppliers, end-user customers, sales people and delivery route managers to efficiently monitor and manage their supply relationships through *iZap*'s Internet-based transaction platform.

iZap

Automated Replenishment System

Applications

Vendor managed inventory

Automate manual vendor managed inventory or “breadman” programs with the tools to execute accurate replenishment orders.

Lean manufacturing

Reduce work-in-progress and finished goods inventory through better order execution.

Automated remote order entry

Electronically transmit orders directly to suppliers eliminating the need for manual order entry.

Bin management

Automate and enhance bin management or Kanban programs.

How Does iZap Work?

- 1 Scan bar code labels bins to begin a reorder cycle.
- 2 Transmit the order electronically. Order electronically confirmed.
- 3 Supplier receives order electronically.
- 4 Supplier picks, packs and ships products “just-in-time.”
- 5 Order delivered to your facility.

iZap Implementation

Your iPower salesperson or distributor can work with you to implement the iZap system to meet your needs. Whether you use iZap as a remote order entry tool or part of a vendor managed inventory or breadman program, set-up is a snap. And, no on-site software is required.

Simply identify the parts and locations that you wish to include in the program, build or export a simple parts database and upload to the iZap transaction platform. Print and apply the barcode labels.

Start scanning!

iZap is powered by:  SONIC CHAIN
